Board of Commissioners
Public Utility District No. 1 of Lewis County
Chehalis, Washington

Report on Compliance with the Energy Independence Act

In November 2006, Washington voters approved Initiative 937, referred to as the Energy Independence Act. The Act requires electric utilities with more than 25,000 customers to meet renewable energy and energy conservation targets.

Our Office is required to examine municipal electric utilities' and public utility districts' compliance with these requirements. As of this reporting period, our Office was required to examine 13 such electric utilities with more than 25,000 customers operating in Washington State. Public Utility District No. 1 of Lewis County is one of those utilities.

Please find attached our report on the District's compliance with the Act.

Sincerely,

A handwritten signature in cursive script that reads "Pat McCarthy".

Pat McCarthy, State Auditor

Olympia, WA

INDEPENDENT ACCOUNTANT'S REPORT

Public Utility District No. 1 of Lewis County January 1, 2022 through December 31, 2022

Board of Commissioners
Public Utility District No. 1 of Lewis County
Chehalis, Washington

We have examined Public Utility District No. 1 of Lewis County's compliance with the following requirements of the Energy Independence Act codified in the Revised Code of Washington (RCW) 19.285.040 (the specified requirements). Specifically, we examined whether the District:

- Complied with its renewable energy target of 140,893 megawatt-hours (MWh), developed as a percentage of the District's average retail load, in accordance with the Act's requirements. The target compliance period was January 1, 2022 through December 31, 2022.

Management of the District is responsible for the District's compliance with the specified requirements. Our responsibility is to express an opinion on the District's compliance with the specified requirements based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and the standards applicable to attestation engagements contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether the District complied, in all material respects, with the specified requirements referenced above.

An examination involves performing procedures to obtain evidence about whether the District complied with the specified requirements. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material noncompliance, whether due to fraud or error. In making an assessment of the risks of material noncompliance, we considered and obtained an understanding of internal control relevant to compliance in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of internal control. Accordingly, we express no such opinion. We believe that the evidence we obtained as summarized in Attachment A, is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent of the District and to meet our other ethical responsibilities in accordance with the relevant ethical requirements related to our engagement.

Our examination does not provide a legal determination on the District's compliance with specified requirements.

In our opinion, the Public Utility District No. 1 of Lewis County complied, in all material respects, with the aforementioned requirements as of the annual renewable energy compliance period ended December 31, 2022.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we are required to report all deficiencies that are considered to be significant deficiencies or material weaknesses in internal control; and fraud or noncompliance with provisions of laws, regulations, contracts, or grant agreements that have a material effect on compliance with the specified requirements of the Act. We are also required to obtain and report the views of management concerning the findings, conclusions, and recommendations, as well as any planned corrective actions. We performed our examination to express an opinion on compliance with the specified requirements and not for the purpose of expressing an opinion on the internal control over compliance and other matters; accordingly, we express no such opinions.

Our examination disclosed no issues that are required to be reported under *Government Auditing Standards*.

A handwritten signature in black ink that reads "Pat McCarthy". The signature is written in a cursive, flowing style.

Pat McCarthy, State Auditor

Grand View 5 East	W5069	13,219	--	--
Totals (MWh):		60,626	65,422	14,845
Total RECs for 2022 compliance (in MWh)		140,893		

Public Utility District No. 1 of Lewis County used Renewable Energy Credits (RECs) it purchased of a value of 140,893 MWhs to meet its renewable energy target. The District's renewable energy target for 2022 was 140,893 MWhs, which is 15 percent of its 939,288 MWh average retail load sold during the previous two years.

The Act (RCW 19.285.030 (20)) defines a Renewable Energy Credit as a tradable certificate of proof of at least 1 megawatt-hour (MWh) of electricity produced from an eligible renewable

resource. In general, a REC represents the environmentally related characteristics, or “non-power” attributes, associated with the 1 MWh of energy produced from a renewable resource.

To be eligible for use toward the District’s renewable energy target, all RECs claimed from power producing facilities, called “generating units”, must be recorded and tracked in the Western Renewable Energy Generation Information System (WREGIS). WREGIS is an independent, renewable energy tracking system maintained by the Western Electricity Coordinating Council (WECC). The District uses WREGIS to track all of its RECs.

WREGIS identifies each generating unit using a unique identification number, or WREGIS Generating Unit ID. Each REC is registered in the District’s own account with a unique serial number. When the District uses a REC toward compliance, it labels the REC as having been used to meet the Act’s requirements to ensure it is removed from further sale, transfer or use.

The Act recognizes as eligible RECs from the qualifying utility’s share of the incremental amount of electricity output from efficiency improvements to hydroelectric projects whose energy output is marketed by the Bonneville Power Administration, provided certain requirements are met. This resource became eligible for compliance periods starting January 1, 2020.

ABOUT THE STATE AUDITOR'S OFFICE

The State Auditor's Office is established in the Washington State Constitution and is part of the executive branch of state government. The State Auditor is elected by the people of Washington and serves four-year terms.

We work with state agencies, local governments and the public to achieve our vision of increasing trust in government by helping governments work better and deliver higher value.

In fulfilling our mission to provide citizens with independent and transparent examinations of how state and local governments use public funds, we hold ourselves to those same standards by continually improving our audit quality and operational efficiency, and by developing highly engaged and committed employees.

As an agency, the State Auditor's Office has the independence necessary to objectively perform audits, attestation engagements and investigations. Our work is designed to comply with professional standards as well as to satisfy the requirements of federal, state and local laws. The Office also has an extensive quality control program and undergoes regular external peer review to ensure our work meets the highest possible standards of accuracy, objectivity and clarity.

Our audits look at financial information and compliance with federal, state and local laws for all local governments, including schools, and all state agencies, including institutions of higher education. In addition, we conduct performance audits and cybersecurity audits of state agencies and local governments, as well as state whistleblower, fraud and citizen hotline investigations.

The results of our work are available to everyone through the more than 2,000 reports we publish each year on our website, www.sao.wa.gov. Additionally, we share regular news and other information via an email subscription service and social media channels.

We take our role as partners in accountability seriously. The Office provides training and technical assistance to governments both directly and through partnerships with other governmental support organizations.
